EDUCATION

Younus College of Engineering and Technology
Kollam, Kerala ,India .
B.Tech in Computer Science and Engineering Aug 2022 -June2026

Entri Elevate – Full Stack Web Development (MERN)
Kerala , India
Jan 01,2025 – Jan17,2026

SKILLS SUMMARY

Domains: Web Development , App Development
Languages: C , Javascript , Typescript , Java , Python
Frameworks: React.js ,Next.js, React-Native , Node.js , Express.js , MongoDB
Platforms: Google Firebase , Supabase , Cloudflare , Vercel , Render , Railway
AI Coding Agents: Google Antigravity , Claude code , Codex

PROJECTS

Full-Stack Web & Modern Frontends

Thanzeer J (Developer Portfolio & Headless CMS) | Live Site | Github

- **Tech Stack:** Next.js 16 (App Router), React 19, TypeScript, Firebase (Auth & Firestore), Cloudflare R2 (S3 SDK), Three.js, GSAP, Lenis, Tailwind CSS
- **Overview:** Production-ready agency website featuring dark/light theming, dynamic project showcases, and a secure internal REST API CMS for content and asset management.
    - *Architected a high-performance developer portfolio and headless CMS using Next.js 16 App Router, React 19, and TypeScript, achieving 98+ Lighthouse scores across 40+ prerendered routes*
    - *Engineered an authenticated admin control center with Firebase Auth and Cloud Firestore, alongside Cloudflare R2 object storage integration for zero-egress media uploads and live case study CRUD management.*
    - *Constructed tactile UI experiences utilizing Three.js 3D physics simulations, Lenis smooth scrolling, a global ⌘K command palette, and machine-readable JSON-LD/llms.txt protocols for search and AI engine discovery.*

RyphTech (Agency Portal & Headless CMS) | Live Site | Github

- **Tech Stack:** Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS v4, Radix UI / shadcn/ui, Recharts, Zod, React Hook Form
- **Overview:** Production-ready agency website featuring dark/light theming, dynamic project showcases, and a secure internal REST API CMS for content and asset management.
    - *Built a high-performance corporate portal and internal CMS using Next.js 16 App Router, React 19, TypeScript, and Tailwind CSS.*
    - *Engineered secure admin REST API endpoints for project lifecycle management, media uploads, and dynamic portfolio catalog management.*
    - *Constructed accessible UI components leveraging Radix UI primitives and shadcn/ui with client analytics visualization..*

Ila Kochi (Restaurant & Reservation Web App) | Live Site | Github **(ongoing project)**

- **Tech Stack:** React 19, TypeScript, Vite, Tailwind CSS v4, GSAP + ScrollTrigger, Three.js, AWS S3 / Cloudflare R2, Firebase
- **Overview:** Experiential hospitality web app featuring cinematic vertical culinary reels, scroll-triggered animations, interactive dietary-filtered menus, and direct-to-WhatsApp booking integration
    - *Crafted an immersive experiential web application using React 19, TypeScript, Tailwind CSS, GSAP ScrollTrigger, and Three.js.*
    - *Engineered high-throughput cloud media delivery pipelines using Cloudflare R2 / AWS S3 for streaming culinary video backgrounds without layout shifts.*
    - *Integrated a direct WhatsApp reservation and pre-order engine, streamlining customer conversions with dynamic dietary filtering.*

Lavender Aquafarm (Specialized E-Commerce & Farm Management) | Live Site | Github

- **Tech Stack:** React 19, Vite, Tailwind CSS, Supabase (Auth & PostgreSQL), Framer Motion, OGL (WebGL 3D), React Router 7
- **Overview:** E-commerce platform for an ornamental aquaculture farm featuring a custom 3D WebGL species visualizer, dynamic slide-out cart drawer, and a protected live stock management admin panel.
    - *Developed an e-commerce and inventory portal for an aquaculture enterprise with React 19, Supabase, and Tailwind CSS.*
    - *Created an interactive 3D WebGL species visualizer utilizing OGL and Framer Motion for smooth cylindrical browsing.*
    - *Built a real-time admin management portal for live inventory CRUD operations, order status transitions, and customer inquiry management.*

Cardamom Village (Agro-Tourism & Spice Showcase) | Live Site | Github

- **Tech Stack:** React 19, Vite, Tailwind CSS
- **Overview:** Modern agricultural brand showcase highlighting plantation-to-doorstep traceability, spice catalog, and buyer contact channels.
    - *Developed a responsive brand presentation portal for a heritage spice plantation using React 19 and Tailwind CSS, focusing on farm-to-table storytelling and product showcases.*

GulfWings3000 (Digital Magazine & Publishing Portal) | Live Site | Github **(ongoing project)**

- **Tech Stack:** React 19, Vite, React Router 7, Supabase (Auth & PostgreSQL), react-pdf
- **Overview:** Digital publishing portal featuring an in-browser PDF reader, issue archives, community event directory, and an editorial back-office console.
    - *Built a digital magazine publishing platform featuring an in-browser PDF reader with custom pagination, zoom, and fullscreen controls.*
    - *Implemented Supabase-backed content management workflows enabling administrators to archive magazine editions and organize community events.*

Cross-Platform Mobile Applications

FutureSelf (AI-Powered Career & Placement Readiness Ecosystem) | Github | UI/UX

- **Tech Stack:** React Native, Expo (SDK 54), Firebase (Auth, Firestore, Storage), Google Gemini 1.5, Genkit AI, Judge0 REST API, Monaco Editor, Victory Native
- **Overview:** A full-stack mobile platform leveraging LLMs and cloud runtimes to automate career guidance, personalized skill gap diagnostics, and coding assessments for college students and placement recruiters.
    - **Implemented end-to-end LLM workflows** leveraging Google Gemini API to analyze user performance data, identify skill deficiencies, and generate personalized learning roadmaps with Coursera/Udemy resource matching.
    - **Integrated a remote sandboxed code execution engine** utilizing Monaco Editor and Judge0 API supporting JavaScript, Python, Java, and C++ with real-time test-case validation and execution feedback.
    - **Architected real-time analytics dashboards** visualizing student readiness indices, peer benchmarks, and interview diagnostics using SVG radial gauges and Victory Native chart visualizations

StudyVault / YCET Portal (College ERP & Academic Analytics Platform) | Github | UI/UX

- **Tech Stack:** React Native, Expo, React Navigation, Firebase (Auth & Firestore), Supabase, React Native Paper, Victory Native / Chart Kit, React Native Skia
- **Overview:** A cross-platform academic ERP unifying operations for Students, Faculty, HODs, Placement Officers, and Admins. Handles live attendance marking, CIA mark computation, and placement drive tracking
    - *Developed an enterprise College ERP mobile application with React Native and Firebase, supporting 5 user roles with dynamic role-based access control (RBAC).*
    - *Implemented batch-write data pipelines for class-wide attendance marking and CIA grade computations, cutting faculty administrative logging time significantly.*
    - *Constructed an interactive placement recruitment portal enabling placement coordinators to filter candidate databases by CGPA, department, and eligibility criteria in real time*

RationKart (Digital Public Distribution System with Doorstep Delivery) | Github | **UI/UX**

- **Tech Stack:** React Native, Expo (SDK 54/57), Expo Router (File-based), Firebase (Auth, Firestore, Cloud Storage), Expo Location, React Native Reanimated
- **Overview:** A multi-tenant civic mobile application digitizing the Indian Public Distribution System (PDS) across 4 roles: Customers (Cardholders), Fair Price Shop Merchants, Delivery Agents, and Government Admins.
    - *Architected RationKart, a 4-role civic mobile application (Customer, Merchant, Delivery Agent, Government Admin) digitizing subsidized food grain distribution and home delivery using React Native and Expo.*
    - *Engineered statutory entitlement calculation algorithms matching household ration card classifications (AAY, PHH, NPHH) to calculate monthly subsidized commodity quotas.*
    - *Integrated end-to-end logistics with real-time Firestore synchronization, featuring turn-by-turn GPS navigation integration, batch inventory allocation, and OTP-authenticated delivery handoffs.*

Developer Tools & Systems

Website Reaper (Autonomous Full-Fidelity Web Scraper & Offline Packager) | Live Site | Github

- **Tech Stack:** Node.js, Express, Puppeteer-Core (Chromium), Cheerio, Wget, PostCSS, Server-Sent Events (SSE), Archiver
- **Overview:** A high-speed hybrid website mirroring and runtime generation engine that extracts modern SPAs (Next.js, React, Nuxt) with complete DOM hydration, WebGL/3D assets, CSSOM keyframes, and packages them into self-contained offline bundles.
-
    - *Architected an autonomous full-fidelity website cloning and offline packaging engine combining headless Chromium automation (puppeteer-core) and multi-threaded network mirroring.*
    - *Engineered a 4-layer runtime immune shield that neutralizes React/Next.js hydration crashes, rewrites client-side fetch pipelines, and serves offline 3D WebGL/WASM assets with 100% fidelity.*
    - *Built real-time telemetry and AST DOM pruning tools utilizing Server-Sent Events (SSE) and Cheerio, allowing users to inspect and selectively harvest modular sections of complex single-page apps.*

WORK EXPERIENCE

FREELANCE WEB & APP DEVELOPER | RYPHTECH **February 2025 – August 2026**

- Designed and developed responsive business, semi-e-commerce websites, and custom web applications based on client requirements.
- Built frontend interfaces and integrated REST APIs, databases, and third-party services using React.js, JavaScript, Tailwind CSS, Supabase, and PostgreSQL.
- Managed the complete project lifecycle, including requirement gathering, development, testing, deployment, maintenance, and troubleshooting.
- Collaborated directly with clients to deliver customized solutions within agreed timelines.

CERTIFICATES

MACHINE LEARNING Internship (ICT Academy of Kerala) | CERTIFICATE **July 11 - August 30, 2024**

- Developed practical skills in machine learning, focusing on advanced data analysis and model optimization.
- Engaged in hands-on projects and interactive sessions with key algorithms and machine learning tools.

PYTHON PROGRAMMING WORKSHOP (IEDC) | CERTIFICATE **July 2 - July 4, 2024**

- Developed strong proficiency in Python programming, including advanced concepts and best practices.
- Gained hands-on experience with real-world projects, focusing on problem-solving and software development skills.
